AN OPEN LETTER TO HUMANITY:

The economy is bad. None of us can dispute that – simply turn on the TV or open a newspaper, better yet, call a friend or relative and hear the sad news that someone has lost their job with a family to feed, bills to pay, and doctor's bills or healthcare costs.

Believe it or not, there are some who are worse off than others. There are some who are too ill to work, and for whatever reason, cannot access life-sustaining drugs they desperately need just to climb out of bed, eat a meal, or pick-up the phone and call for help.

We are the catalyst between you and them. We need your help – now.

President Obama successfully waged a campaign with donations as small as 5 bucks and as large as \$100. Let's do the same.

Remember what it's like not to have. Remember what it's like to feel helpless and hopeless. Remember there are others less fortunate than you and me.

Please send your donation today. Adopt a patient or adopt a state, but please help the cause. HIV/AIDS is not over, it is alive and well and living next door or possibly living with someone you know very well, but you don't know that.

Thanks for helping us help others.

From my heart -

Greg Edwards
Executive Director
